| Istanbul, TURKIYE

Personal Information

I am open to long-term internship and part-time opportunities. I am eager to keep growing and learning across different fields. I enjoy picking up new tools and technologies by actually building with them

Education

Istanbul Technical University 2022 – 2027

Computer Engineering, 4th Year, GPA: 3.03

- Related Courses: Object Oriented Programming, Data Structures, Analysis of Algorithms, Learning From Data, Database Systems, Project Management

Muğla 75th Anniversary Science High School 2017 – 2021

Projects

Overload – Mobile Workout Tracking App 2026

- Built a cross-platform Flutter/Dart app with local SQLite storage to log workouts and track progressive overload.
- Designed an exercise centered data model with full CRUD, set history, and input validation; deployed to a physical device.

Video Game Sales Analysis 2025

- Conducted exploratory data analysis on a video game sales database to identify market trends and user preferences.
- Used Python data-processing and visualization libraries; worked with relational database systems for data retrieval.

Model Training – Emotion Classification 2025

- Built machine learning models to automatically classify emotional states from datasets.
- Applied classification and dimensionality-reduction techniques (SVM, PCA, LDA) during model training.

Technical Skills

Programming Languages: Python, C, C++, Dart

Data Science: SVM, PCA, LDA, statistical data analysis

Database & Querying: MySQL, SQLite

Frameworks & Tools: Flutter, GitHub, Tableau

Other Skills

Analytical Reporting: Ability to transform findings of technical projects into professional presentations and reports.

Volunteering: League and tournament organization, tennis training within the ITU Tennis Club (2025 – 2026); Erasmus+ student exchange program (2018 – 2019).

Languages: English (B2)

Sports: Active basketball and tennis player.
